SAIL including subsidiaries	*VSP*
85-90% of these by-products available are sold under long terms contracts, under long term contracts, under a Committed Supply Scheme.	Ammonium Sulphate is distributed through dealers, possessing registration certificates under Fertilizer Control Order.
The balance 10 to 15% products (adhoc availability) are sold to consumers, who have registered their demand with SAIL, based on their past three year's off-take from SAIL.	Crude Tar is sold against open tenders. Some quantities are sold to sister steel Plants also.
30% of the adhoc availability is allocated to local consuming industry on preferential basis.	
Whenever adhoc availability is higher than the registered demand, surplus quantities are sold to interested customers.
